

TURN IT IN

- Student involvement and advantages
 - More accountability, make them responsible for their own learning
 - All submissions are dated and specific closing times for assignments can be set up
 - Calendar option, so they know when deadlines are coming up, docs such as notes and such can be uploaded, simple way to create a form of a class page
 - Hold online discussions and have the option to assign a student as a moderator
- Teacher advantages
 - Email students and parents if desired of reminders, notes...
 - Whole classes or individual
 - Provide students grammatical feedback without any work on your part
 - Provide students the opportunity to learn how to and the importance of putting things in their own words
 - Easily create assignments and upload rubrics
 - Assignments for multiple classes only need to be created once
 - For course-wide rubrics we can upload them for you
 - No more carrying around stacks of papers
 - Be able to get statistics on individual/class submissions, grading and originality
 - Class statistics

What if...

- You don't have enough computer access:
 - Check the computer lab or library for openings
 - Get your students onto TurnItIn once and from there, there are ample computers on campus for them to upload even if technology is an issue at home.
 - Option: we can assist you with this
 - For students who appear to really struggle with accessing technology you do have the option to upload for them through a flash drive
- I don't feel comfortable with technology:
 - We can help your students get an account for the first time
 - Computer lab techs (Noah and Shirley) are pretty comfortable with the program
 - We are always here to help!
- I don't have time to assign a long essay:
 - Assign only a paragraph response,, page long summarizations and/or analysis
